

The Century Project – Update

In our ongoing commitment to keep Team Members informed, below are the updates for the proposed renovation of the Space Needle.

Century Project Updates:

- *We are moving closer to deciding when and how the project will happen.*
- *With the complexities of trying to stay open during construction, the building permit process is taking longer than we anticipated.*
- *We should have more clarity on the permitting process by late spring or early summer.*
- *We are working with contractors, the City, and Seattle Center on different construction scenarios and timelines.*
- *One scenario would have construction starting in fall of 2017 if approved.*
- *We will continue to update you on the process.*

Our Team Members are the living, breathing soul of the Space Needle. We believe we attract, hire, and retain the best employees in the Seattle area. We believe that over time our approach to the impacts of a potential closure for construction will be viewed as the high water mark for a company handling such a historically significant project.

Active Team Members are invited to an optional informational meeting on Wednesday, May 3rd at 3:00 pm

in the Taylor Building Pike Place Training Room to answer additional questions.
